BLOCK _____ LOT _____

DATE _____ FREEBOARD – 3 FOOT

BARNEGAT TOWNSHIP COMMUNITY ID # 340396

FLOOD PLAIN PERMIT CHECKLIST FOR VE ZONE & COASTAL A ZONE (AE)

BLOCK: _____ LOT: _____ TYPE OF WORK _____

ADDRESS _____

COST OF CONSTRUCTION _____ PREVIOUS DEMOLITION DATE _____

FLOOD ZONE/BFE - Effective _____ Preliminary Map _____ DFE (BFE + 1 foot) _____

PROPOSED ELEVATIONS

FF _____ GF _____ CF _____ MECH _____ LAG _____ HAG _____ V ZONE _____ LIMWA _____

Two (2) sets of floor plans showing the proposed work. All Coastal A zones (AE) structures must be built to V zone standards. The bottom of the lowest horizontal structural member must be above the DFE and must be indicated on the plan. All materials below the DFE must be of flood resistant materials.

All utilities and equipment must be above the DFE. Provide location and elevation of utilities on the plans. Note on plans that enclosed area below the DFE may only be used for storage, parking, or access to the home.

Structures (and piling) in VE Zone and Coastal A Zone must be designed and certified by a licensed Professional Engineer or Architect including breakaway walls. Attendant utilities and equipment shall not be mounted on, pass through or be located on breakaway walls.

Flood venting equal to 1 square inch per square foot of enclosed area required.

Properties in the Coastal A Zone must provide the LIMWA (Coastal A – Limit of moderate wave action) line on the as built survey. If the structure is located in more than one flood zone, the location and identification of all flood zones must be indicated on the as built survey.

Elevation Certification with Photographs needed for Final As Built survey, along with V zone certification and Flood Vent Certification attached to the As Built Elevation Certificate.

Prepared by LFF _____ Received by Homeowner _____ Received by Contractor _____

New Jersey NFIP Model Floodplain Development Permit

If you are proposing development of any kind (constructing a new building, adding on to an existing building, clearing land, placing fill, mining, drilling, etc.) in a floodplain as defined by NJDEP or FEMA, you **MUST** submit this application to your local FPA. Depending upon the type of development you are proposing, additional forms and/or permits may be required.

Per NFIP participation rules, if the property you propose to develop is located within a Special Flood Hazard Area on a FEMA FIRM, you **MUST** obtain a Floodplain Development Permit prior to beginning the project in accordance with the requirements of the local Flood Damage Prevention Ordinance of your community. Failure to do so may incur penalties, including high insurance rates.

For the purposes of this application, the "Applicant" is considered either the property owner, builder, or engineer. The "Applicant" cannot be the FPA. Typically, the Applicant completes Part I, II, & III of this application and submits the information to the local FPA. If any information is missing by the Applicant, the FPA will assist in filling in the missing information. The FPA reviews the submission, forms a determination, then notifies the Applicant of whether or not additional information is needed. Once all required materials have been submitted, the FPA will make a permitting decision and either issue a permit, which may include conditions of approval, or deny the requested permit.

**BARNEGAT TOWNSHIP, COUNTY OF OCEAN,
STATE OF NEW JERSEY**

The Floodplain Development Permit application assists communities in evaluating impacts of activities proposed within New Jersey regulated floodplains or FEMA's Special Flood Hazard Areas (SFHAs). All activities must be in compliance with the regulations and standards set forth by local, state, and federal entities. For residents and property owners to be eligible for national flood insurance rates under the National Flood Insurance Program (NFIP), for communities to receive certain kinds of federal monies, the community must agree to meet certain floodplain development standards. The Floodplain Development Permit application packet is a tool to ensure these standards are met. It should be noted that depending on the type of development, you may be required to hire a surveyor or engineer to help complete the required forms.

Prior to applying for a Floodplain Development Permit, the Applicant **MUST** obtain other required federal, state, and local permits, including the required New Jersey Land Resource Protection Permits set forth by the New Jersey Department of Environmental Protection (NJDEP). Refer to *Appendix B* of this application for a list of potential permit-by-rules, general permits-by-certification, and general permits, or see your local Floodplain Administrator. All permits obtained for the project **MUST** be attached to this application.

If approved, a community official, or the Floodplain Administrator (FPA), will perform inspections throughout the project, as well as when the project is completed to ensure that the development is compliant with the requirements of the local Flood Damage Prevention Ordinance, thus helping you get a better premium rate on flood insurance.

PART I

The Applicant (i.e. Owner/Builder/Engineer) completes the General Provisions.

PART II

Complete the Owner/Builder/Engineer Information and Project Overview.

Project Overview

Provide a description of the project location and attach a recent survey. Check all the applicable box(es) under project type that are being proposed.

PART III

Complete and attach required information for the Flood Hazard Area Checklist information and other permits.

APPLICATION INSTRUCTIONS

Flood Hazard Area Checklist Information

PART V

The FPA will indicate if the proposed development is conformant with the requirements of the local Flood Damage Prevention Ordinance, and if the requested permit is issued. If the decision is to **NOT** issue the permit, the FPA will provide an explanation of the perceived deficiencies to the Applicant.

PART VI

The FPA will track inspection results and deficiencies. The elevation certificate representing final construction will also be reviewed for accuracy.

PART IV

Check all the applicable box(es) under "Flood Hazard Area Information Required for Review" and provide input when directed. Provide required documentation if applicable. The Applicant must obtain other required federal, state, and local permits, including NJDEP Land Use Permits **PRIOR** to applying for a Floodplain Development Permit. Refer to *Appendix B* for a list of potential permits.

Other Permits

DEFINITIONS

ASCE 24: The standard for Flood Resistant Design and Construction referenced by the building code, and developed, and published by the American Society of Civil Engineers, Reston, VA. References to ASCE 24 shall mean ASCE 24-14 or the most recent version of ASCE 24 adopted in the UCC Code [N.J.A.C. 5:23].

Base Flood: A flood having a 1% chance (100-year) of being equalled or exceeded in any given year.

Base Flood Elevation (BFE): The water surface elevation resulting from a flood that has a 1% or greater chance of being equalled or exceeded in any given year, as shown in a published Flood Insurance Study (FIS), Flood Insurance Rate Map (FIRM) or preliminary flood elevation guidance from FEMA. May also be referred to as the "100-year flood elevation."

Best Available Flood Hazard Data: The most recent available preliminary flood risk guidance FEMA has provided. The Best Available Flood Hazard Data may be depicted on but not limited to Advisory Flood Hazard Area Maps, Work Maps, or Preliminary FIS and FIRM.

Conditional Letter of Map Revision (CLOMR): A Conditional Letter of Map Revision (CLOMR) is FEMA's comment on a proposed project that would, upon construction, affect the hydrologic or hydraulic characteristics of a flooding source and thus result in the modification of the existing regulatory floodway or Special Flood Hazard Area (SFHA). The letter does not revise an effective FIRM map, it indicates whether the project, if built as proposed, would be recognized by FEMA. FEMA charges a fee for processing a CLOMR to recover the costs associated with the review as described in the Letter of Map Change (LOMC) process. Building permits cannot be issued based on a CLOMR, because a CLOMR does not change the FIRM map.

Critical Facility: Structures with American Society of Civil Engineers (ASCE) Class III and IV flood design classifications (as described in ASCE 24-14 Table 1.1) that provide services and functions essential to a community, especially during and after a disaster, and require additional freeboard for protection. Critical facilities with Class IV designations must be elevated or protected to 2 feet above DFE or to the 500-year (0.2% chance) flood elevation, whichever is higher.

Development: Any man-made change to improved or unimproved real estate, including but not limited to buildings or other structures, mining, dredging, filling, grading, paving, excavation or drilling operations or storage of equipment or materials.

Elevation Certificate: An administrative tool of the National Flood Insurance Program (NFIP) that can be used to provide elevation information, to determine the proper insurance premium rate, and to provide the support required for a Letter of Map Amendment (LOMA) or Letter of Map Revision based on Fill (LOMR-F).

Federal Emergency Management Agency (FEMA): The Federal agency under which the NFIP is administered.

FEMA Publications: Any publication authored or referenced by FEMA related to building science, building safety, or floodplain management related to the National Flood Insurance Program. Publications include but are not limited to technical bulletins, desk references, and ASCE 24.

Flood Hazard Area Design Flood Elevation (FHDFE): Per the New Jersey Flood Hazard Area Control Act, the peak water surface elevation that will occur in a water during the flood hazard area design flood. This elevation is determined via available flood mapping adopted by the State, flood mapping published by FEMA (including effective flood mapping dated on or after January 31, 1980, or any more recent advisory, preliminary, or pending flood mapping; whichever results in higher flood elevations, wider floodway limits, greater flow rates, or indicates a change from an A Zone or Coastal A Zone), approximation, or calculation pursuant to the Flood Hazard Area Control Act Rules at N.J.A.C. 7:13-3.1 – 3.6 and is typically higher than FEMA's Base Flood Elevation (BFE). A water that has a drainage area measuring less than 50 acres does not possess, and is not assigned, a flood hazard area design flood elevation.

Flood Insurance Rate Map (FIRM): The official map on which FEMA has delineated both the areas of special flood hazards and the risk premium zones applicable to the community.

Flood Insurance Study (FIS): The official report of a community in which the FEMA has provided flood profiles, as well as Flood Insurance Rate Map(s) and the risk premium zones applicable to the community.

Floodplain or Flood Prone Area: Any land area susceptible to being inundated by floodwaters from any source.

Floodproofing: Any combination of structural and nonstructural additions, changes or adjustments to structures, which reduce or eliminate risk of flood damage to real estate or improved real property, water and sanitation facilities or structures with their contents.

Floodway: The channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than 0.2 foot.

Freeboard: A factor of safety usually expressed in feet above a flood level for purposes of floodplain management. "Freeboard" tends to compensate for the many unknown factors that could contribute to flood heights greater than the height calculated for a selected size flood and floodway conditions, such as wave action, bridge openings, and the hydrological effect of urbanization of the watershed.

Letter of Determination Review (LODR): FEMA's ruling on the determination made by a lender or third party that a borrower's building is in a Special Flood Hazard Area (SFHA). A LODR deals only with the location of a building relative to the SFHA boundary shown on the Flood Insurance Rate Map (FIRM).

Letter of Map Amendment (LOMA): A Letter of Map Amendment (LOMA) is an official amendment, by letter, to an effective Flood Insurance Rate Map (FIRM) map that is requested through the Letter of Map Change (LOMC) process. A LOMA establishes a property's location in relation to the Special Flood Hazard Area (SFHA). LOMAs are usually issued because a property has been inadvertently mapped as being in the floodplain but is actually on natural high ground above the base flood elevation.

Letter of Map Revision (LOMR): A Letter of Map Revision (LOMR) is FEMA's modification to an effective Flood Insurance Rate Map (FIRM). LOMRs are generally based on the implementation of physical measures that affect the hydrologic or hydraulic characteristics of a flooding source and thus result in the modification of the existing regulatory floodway, the effective Base Flood Elevations (BFEs), or the Special Flood Hazard Area (SFHA). The LOMR officially revises the Flood Insurance Rate Map (FIRM) and sometimes the Flood Insurance Study (FIS) report, and when appropriate, includes a description of the modifications. A LOMR is issued only by FEMA.

Letter of Map Revision Based on Fill (LOMR-F): A Letter of Map Revision Based on Fill (LOMR-F) is FEMA's modification of the Special Flood Hazard Area (SFHA) shown on the Flood Insurance Rate Map (FIRM) based on the placement of fill outside the existing regulatory floodway. A LOMR-F may be initiated through the Letter of Map Change (LOMC) process. A LOMR-F is issued only by FEMA.

Limit of Moderate Wave Action (LIMWA): Inland limit of the SFHA (AE Zone) affected by waves between 1.5 and 3 feet. Base Flood conditions between the V Zone and the LIMWA will be similar to, but less severe than, those in the V Zone. Also known as "Coastal A Zone" areas.

Local Design Flood Elevation (LDFE): The elevation reflective of the most recent available preliminary flood elevation guidance FEMA has provided as depicted on but not limited to Advisory Flood Hazard Area Maps, Work Maps, or Preliminary FIS and FIRM which is also inclusive of freeboard specified by the New Jersey Flood Hazard Area Control Act and Uniform Construction Codes and any additional freeboard specified in a community's ordinance. In no circumstances shall a project's LDFE be lower than a permit-specified Flood Hazard Area Design Flood Elevation or a valid NJDEP Flood Hazard Area Verification Letter plus the freeboard as required in ASCE 24 and the effective FEMA Base Flood Elevation.

Lowest Floor: In A Zones, the lowest floor is the top surface of the lowest floor of the lowest enclosed area (including basement). In V Zones and Coastal A Zones, the bottom of the lowest horizontal structural member of a building is the lowest floor. An unfinished or flood resistant enclosure, usable solely for the parking of vehicles, building access or storage in an area other than a basement is not considered a building's lowest floor provided that such enclosure is not built so as to render the structure in violation of other applicable non-elevation design requirements of these regulations.

Lowest Horizontal Structural Member: In an elevated building in a Coastal A Zone or Coastal High Hazard Area (VE Zone), the lowest beam, joist, or other horizontal member that supports the building is the lowest horizontal structural member. Grade beams installed to support vertical foundation members where they enter the ground are not considered lowest horizontal members.

National Flood Insurance Program (NFIP): The program of flood insurance coverage and floodplain management administered under the Act and applicable federal regulations promulgated in Title 44 of the Code of Federal Regulations, Subchapter B. This community has voluntarily chosen to receive the benefits of participation in this program by adopting a Floodplain Development Permit.

Preliminary FIRM & FIS: Preliminary flood hazard data and map products provide the public with an early look at their home or community's projected risk to flood hazards. Preliminary data may include new or revised Flood Insurance Rate Maps (FIRM), Flood Insurance Study (FIS) reports, and FIRM Databases.

Special Flood Hazard Area (SFHA): The greater of the following: (1) Land in the floodplain within a community subject to a 1% or greater chance of flooding in any given year, shown on the FIRM as Zone V, VE, V1-3-, A, AO, A1-30, AE, A99, or AH; (2) Land and the space above that land, which lies below the peak water surface elevation of the flood hazard area design flood for a particular water, as determined using the methods set forth in the New Jersey Flood Hazard Area Control Act in N.J.A.C. 7:13; (3) Riparian Buffers as determined in the New Jersey Flood Hazard Area Control Act in N.J.A.C. 7:13. Also referred to as the AREA OF SPECIAL FLOOD HAZARD.

Structure: A walled and roofed building, a manufactured home, or a gas or liquid storage tank that is principally above ground

PART I – GENERAL PROVISIONS - To Be Completed by the Applicant

GENERAL INFORMATION – To be read and signed by the Applicant

1. No work of any kind may start in the NJ Flood Hazard Area or FEMA SFHA until all permits, including, but not limited to a floodplain development permit, are issued.
2. This permit may be revoked if any false statements are made herein.
3. If revoked, all work must cease until a permit is re-issued.
4. Development shall not be used or occupied until a Certificate of Occupancy is issued.
5. Work must commence within six (6) months of issuance or this permit will expire.
6. The Applicant is hereby informed that other permits may be required to fulfill federal, state, or local regulatory requirements.
7. The Applicant hereby gives consent to the Administrator or his/her representative to make reasonable inspections that are required to verify compliance.
8. The Applicant certifies that "All statements herein and in attachments to the application are true and accurate to the best of my knowledge."

FLOOD HAZARD AREA CHECKLIST INFORMATION (See Appendix A)	
Flood Hazard Area Information Required for Review	Included?
<p>Provide an estimate of the current market value of the property: Land \$ _____ Structure \$ _____</p> <p>Provide an estimate of the total cost of building improvements using qualified labor and materials obtained at market prices. (Note: Unpaid or discounted labor and materials must be counted at their true market cost per the NFIP.) \$ _____</p> <p>Estimates should either be signed and sealed by the Applicant's architect or engineer, an estimating firm's or contractor's estimate signed and sealed by an engineer, or a bona fide contractor's bid.</p> <p>Plans – all submitted development plans must include sufficient detail to complete the permit review. See Appendix A for additional information.</p> <p>All elevations on the submitted plans shall be in NAVD88.</p> <p>Plans showing the location, layout, and elevation of existing and proposed development including parking areas, driveways, drainage, sewer, and water facilities (including connections), plantings, seedlings, fences, signs, and any other information necessary for managing the floodplain.</p> <p>A Zone Construction – The dimensions, location, and elevation of the lowest floor (including basements) of existing and proposed structures. The elevations shall be in relation to NAVD88.</p> <p>V Zone and Coastal A Zone Construction seaward of the Limit of Moderate Wave Action (LIMWA) – Plans must show the lowest horizontal member of the structure (including any venting, insulation, etc.) and the dimensions, location, and elevation of the lowest floor (including storage areas and garages) of existing and proposed structures. The elevations shall be in relation to NAVD88. Basements, mechanical pits, underground parking garages, etc. are prohibited in these zones. Construction must have open foundations. Back-filled stem walls are permissible in Coastal A Zones only. Completed <i>V Zone Certifications and Breakaway Wall Certifications</i> shall be included in the permit application.</p> <p>Watercourses – The description of the extent of any watercourse, if any, which will be altered and/or relocated as the result of the proposed development must show exact location of the floodway and flood hazard area limits.</p> <p>Wet and Dry Floodproofing Certification (non-residential or approved historic structures only) – Certification by a Professional Engineer or Architect that the floodproofing methods meet the floodproofing criteria in ASCE 24 for nonresidential structures. The plans must also show the elevation in relation to NAVD88 that a floodproofed structure is protected to. A partially completed <i>Floodproofing Certification</i> (completed by the Architect certifying the construction design) shall be included in the permit application and a fully completed <i>Floodproofing Certification</i> must be provided prior to occupancy.</p> <p>For structures in more than one flood zone – If the structure is in more than one flood zone, the location and identification of all flood zones must be indicated on the survey and the most restrictive design flood elevation shall be used in all development plans.</p> <p>For Elevators – plans shall comply with FEMA Technical Bulletin 4 and ASCE 24. All required flood-resistant construction information shall be noted on the plans.</p>	

PART III – REQUIRED DOCUMENTATION - To Be Completed by the Applicant

Description	Expiration Date	Date of Issuance	Permit #	Permit by Type (Federal, State, Local) * Attach additional sheet if necessary
List Other Permits obtained for the project: (Attach obtained permits)				
<p>The applicant must obtain the required Federal, State, and Local permits prior to applying for a Floodplain Development Permit (See Appendix B for a detailed list of agencies and permits). The proposed development MUST be in compliance with other Federal, State, and Local laws.</p>				

OTHER PERMITS (See Appendix B)	
<p>For Below-Grade Parking Garages (not permitted for residential buildings and in Coastal A and V Zones) – plans shall comply with FEMA Technical Bulletins 3 and 6, note all required information on the plans, and include a partially completed <i>Floodproofing Certification</i> (completed by the Architect certifying the construction design), an <i>Emergency Operations Plan</i>, and an <i>Inspection and Maintenance Plan</i> in this application. A fully completed <i>Floodproofing Certification</i> must be provided prior to occupancy.</p>	
<p>For Historic Structures – Documentation confirming that the property is listed on an approved State or Federal Historic Register inventory.</p>	
<p>For Enclosures – Evidence of a <i>Deed Restriction</i> for the structure must be included in the permit application if enclosed space is greater than 6 feet in height as per N.J.A.C. 7:13-12.5(p)6. Local ordinances may also require a Non-Conversion Agreement.</p>	
<p>FEMA LOMA, CLOMR, LOMR, LOMR-F forms shall be fully completed with documentation of a recent Endangered Species Program Review if a Community Acknowledgement is requested prior to submission to FEMA.</p>	
<p>Elevation Certificates – Partially completed Elevation Certificates are required to be submitted at foundation completion and prior to inspection to ensure that the lowest floor or lowest horizontal structural member is properly elevated, and all required openings are properly constructed. A fully completed elevation certificate must be submitted prior to occupancy.</p>	
<p>Additional Required Information:</p>	

PART IV – FLOOD INFORMATION - To Be Completed by the Floodplain Administrator

FLOOD HAZARD DATA & LOCAL DESIGN FLOOD ELEVATION

Complete the Local Design Flood Elevation (LDFE) Worksheet in **Appendix C** and attach it to this permit. This will calculate the proper DFE and flood zone for the proposed development.
 Worksheet completed: Y / N

For more information on the methods to determine the flood hazard area and DFE see
Technical Manual: Flood Hazard Area Control Act Rules, 2018
https://www.nj.gov/dep/landuse/download/fh_044.pdf

FLOOD HAZARD VERIFICATION

Unexpired NJDEP Land Resource Protection Flood Hazard Verification Letter with a Flood Hazard Area Design
 Flood Elevation Submitted? Y / N Date:
 Unexpired NJDEP Verification Letter with a Verification of Riparian Zone limits submitted?
 Y / N Date:
 Recent Permit Applicability Determination from the NJDEP Division of Land Resource Protection?
 Y / N

Comments:

RIPARIAN ZONE¹

Stream Classification:			
Category One within HUC-14:	Yes / No	If Yes, Upstream	
Trout Status:	Trout Maintenance	Trout Production	
Threatened & Endangered Species Within 1 Mile Downstream:	Yes	No	
Riparian Zone Width:	50'	150'	300'
Riparian Zone Clearing:	Yes / No	If Yes, how much? square feet	

¹ Riparian zones exist along both sides of every regulated water, regardless of the water's drainage area, and include the regulated water itself.

SITE SPECIFICATIONS (See Appendix D for additional sections to print and add to this section)

For any Community Acknowledgement requested,

1) Has the applicant provided sufficient Endangered Species Assessment documentation? Y / N
Explain:

2) Has the applicant documented the site is reasonably safe from flooding (see *FEMA Technical Bulletin 10**)?
Y / N
Explain:

Note: Applications for Letters of Map Change with lowest floors including basements, parking garages, machine pits, etc. below the FEMA Base Flood Elevation will be returned to the municipality for enforcement action as a potential violation by FEMA. Further review of the request will be halted until the violation is addressed.

Substantial Damage / Substantial Improvement:

Substantial Improvement (SI) Estimate _____ \$
Substantial Damage (SD) Estimate _____ \$
Market Value of Property (Structure Only) _____ \$
Assessed Value of Property (Structure Only) _____ \$
Substantial Improvement / Substantial Damage Percentage _____ %
Cumulative SI/SD Amount (Optional) _____ \$
Sufficient Corrosion Protection (*FEMA Technical Bulletin 8**)? Y / N
Data Source: _____
Since? _____

Is this a non-residential building? Y / N If yes, fill out section D-1 in Appendix D.

Is this building in a non-coastal A-Zone? Y / N If yes, fill out section D-2 in Appendix D.

Is this building in a V Zone or Coastal A Zone? Y / N If yes, fill out section D-3 in Appendix D.

Is this a multi-family or mixed-use building? Y / N If yes, fill out section D-4 in Appendix D.

Is this an agricultural structure? Y / N If yes, fill out section D-5 in Appendix D.

Is this an accessory structure? Y / N If yes, fill out section D-6 in Appendix D.

Is there an elevator proposed? Y / N If yes, fill out section D-7 in Appendix D.

Is there below-grade parking proposed? Y / N If yes, fill out section D-8 in Appendix D.

Wet Flooding (FEMA Technical Bulletin 7*):

Note: Flooding is allowed in non-residential buildings only. Prohibited in residential.

Corrosion-Protection? Y / N

*<https://www.fema.gov/fig-technical-bulletins>

^Non-coastal A Zone is defined as riverine areas or tidal areas landward of the Limit of Moderate Wave Action (LIMWA). Coastal A Zone is defined as tidal areas seaward of the Limit of Moderate Wave Action (LIMWA).

PERMIT DETERMINATION	
<input type="checkbox"/>	Permit Approved: The information submitted for the proposed project was reviewed and is in compliance with the flood damage prevention ordinance and New Jersey Flood Hazard Area Control Act rules.
<input type="checkbox"/>	Permit Approved with Conditions: The information submitted was reviewed and the project is conditionally approved assuming certain conditions are met. See attached. <i>Note: No permit shall be approved upon condition upon receiving a State Land Use permit or any other State, Federal, or Local Permit. UCC Building Permits must be received concurrently.</i>
<input type="checkbox"/>	Permit Approved with Variance Granted: A variance was granted for the proposed project. This does not reduce flood risk and does not reduce flood insurance premiums. See attached.
<input type="checkbox"/>	Permit Denied: The proposed project does not comply with the flood damage prevention ordinance and/or New Jersey Flood Hazard Area Control Act rules. See attached.

END

ELEVATION CERTIFICATE

Final Elevation Certificate Received Date: _____

Is the Elevation Certificate correct and in concurrence with the Floodplain Development Permit? (Circle one)

Yes / No

Explain: _____

VIOLATION TRACKING

Is this a Repeat Violation? Y / N

Permit Number: _____

Date of Final Decision: _____

Notice of Violation Date: _____

Start of 30-Day Period: _____

End of 30-Day Period: _____

Court Date: _____

Dates of Extensions: _____

Final Decision: _____

Referral Date for State Enforcement: _____

FEMA Section 1316 Request Date: _____

CERTIFICATION OF COMPLIANCE

Is the completed development in compliance with the Floodplain Development Permit? (Circle one, sign, and provide a copy to the property owner and construction official.)

Yes / No

Name: _____

Signature: _____

Date: _____

Explain: _____

APPENDIX A
Development Plan Requirements

- Two (2) sets of plans showing the existing and proposed work (all rooms in structures must be identified).
- Elevation view of any structure.
- Specify materials, if any, used for fire rating (must be flood-proof)
- Structural details including foundation, floor, wall, ceiling, and roof assemblies.
- Anchoring details of foundation, floor, walls, and roof assembly. Building must be designed to resist all loads, including flood, wind, and uplift, during flooding.
- Location of all mechanical systems (boilers, furnaces, air-conditioning, water heaters, pumps, duct work, etc.); all must be above the Design Flood Elevation (DFE). Sunken tubs are prohibited below the DFE.
- All outdoor air-conditioning units, oil, or propane tanks, unless subsurface, must be elevated and anchored above the DFE.
- The enclosed area below the DFE may only be used for storage, parking, access to the home, or non-livable space.
- The finished ground level of an under-floor space such as a crawl space must be equal to or higher than the outside finished ground level.
- All building material used below the DFE must be of flood resistant material.
- Indicate the type of material used for foundation, floor framing, insulation, walls, and floor finishes.
- Structures in VE Zone and Coastal A Zone must be designed and certified by a licensed Professional Engineer or Architect including breakaway walls.
- Decks in a VE Zone and Coastal A Zone may not be lower than the lowest horizontal member of the main structure (if attached to the structure)
- Flood vents shall be provided for enclosed areas below the DFE including for breakaway walls. Flood vents shall have an opening of 1 square inch per every 1 square foot of enclosed area. Each enclosed area shall have a minimum of 2 flood vents. Flood vents must be installed no more than 12 inches above grade.
- Electrical meter: provide a landing with stairs where required by the utility company for reading the meter.
- All proposed development must comply with the applicable FEMA publications and ASCE 24.

All applicable federal, state, and local permits listed below shall be obtained and plans shall reflect compliance with state requirements.

APPENDIX B Other Applicable Permits

Agency	Permit/Authorization	Regulatory Authority	Description	Links
Delaware and Raritan Canal Commission	Delaware and Raritan Canal Commission Approval	Regulators for the Review Zone of the Delaware and Raritan Canal State Park	Review any action in the Canal Park and Review Zones A and B depending on the activity. In general, all projects located within Zone A are reviewed. Projects in Zone B that do not meet the Commission's definition are a major project are exempt from review.	https://www.nj.gov/dep/drc/c/r/regulatory.html
NJDEP – Division of Land Use Regulation (DLUR)	Freshwater Wetlands Protection Act Permit	Freshwater Wetlands Protection Act (N.J.S.A. 13:9B) and Rules (N.J.A.C. 7:7A)	Regulates activities within jurisdictional wetlands, their transition areas, and State open waters	https://www.nj.gov/dep/landus/e/fww/fw_main.html https://www.nj.gov/dep/landus/e/download/13_9b.pdf https://www.nj.gov/dep/landus/files/njact_7a.pdf
	*Flood Hazard Area Protection Act Permit	Flood Hazard Area Control Act (N.J.S.A. 58:16A) and Rules (N.J.A.C. 7:13)	Regulates activities within regulated waters, flood hazard areas, and riparian zones.	https://www.nj.gov/dep/landus/e/fha_main.html https://www.nj.gov/dep/landus/e/download/58_16a_50.pdf https://www.nj.gov/dep/landus/files/njact_13.pdf
	**Coastal Area Facilities Review Act (CAFR) Permit	CAFR (N.J.S.A. 13:19) Coastal Zone Management Rules (N.J.A.C. 7:7)	Regulates activities within the CAFRA zone. Project must demonstrate compliance with the Coastal Zone Management Rules which defines Special Areas of environmental interest and compliance criteria.	https://www.nj.gov/dep/landus/e/coastal/cp_main.html https://www.nj.gov/dep/landus/e/download/13_19.pdf https://www.nj.gov/dep/landus/files/njact_7.pdf
	**Waterfront Development Act Permit	Waterfront Development Act (N.J.S.A. 12:5-3) Coastal Zone Management Rules (N.J.A.C. 7:7)	The Waterfront area is divided into three sections. Details of each section can be found in the Coastal Permit Program Rules at N.J.A.C. 7:7-2.3. As well as all tidal man-made waterways and lagoons subject to tidal influence found within any three of the geographical areas.	https://www.nj.gov/dep/landus/e/coastal/cp_main.html https://www.nj.gov/dep/landus/e/download/12_5_3.pdf https://www.nj.gov/dep/landus/files/njact_7.pdf
	**Coastal Wetlands Act Permit	Wetlands Act of 1970 (N.J.S.A. 13:9A) Coastal Zone Management Rules (N.J.A.C. 7:7)	Regulated activities in delineated and mapped coastal wetlands pursuant to the Wetlands Act of 1970.	https://www.nj.gov/dep/landus/e/coastal/cp_main.html https://www.nj.gov/dep/landus/files/njact_7.pdf https://www.nj.gov/dep/landus/e/download/13_9a.pdf
	Highlands Preservation Area Approval	Highlands Water Protection and Planning Act (N.J.A.C. 13:20) and Rules (N.J.A.C. 7:38)	Regulates all "major Highlands Developments" as defined by the Highlands Act, in the Preservation Area unless otherwise exempt by the Act. The Highlands Area is located in the northwestern portion of the state.	https://www.nj.gov/dep/landus/e/highlands.html https://www.nj.gov/dep/landus/e/download/13_20.pdf https://www.nj.gov/dep/landus/files/njact_38.pdf
	Water Quality Certification	Section 401 of the Federal Clean Water Act Freshwater Wetlands Protection Act (N.J.S.A. 13:9B) and Rules (N.J.A.C. 7:7A) Coastal Zone Management Rules (N.J.A.C. 7:7) NJ Water Pollution Control Act (N.J.S.A. 58:10A) Tidelands Act (N.J.S.A. 12:3)	All projects requiring a Federal permit for the discharge of dredged or fill material into State waters and/or their adjacent wetlands also require the State Water Quality Certification which ensures consistency with State water quality standards. This also applies to Waters of the U.S. Tidelands are those lands now or formerly flowed by the mean high tide of a natural waterway. These lands are State owned or claimed to be owned. Activates on State owned tidelands requires a tidelands grant, lease or license.	None https://www.nj.gov/dep/landus/e/main.html https://www.nj.gov/dep/landus/e/download/12_3.pdf

Flood Hazard Area Control Act: Permits-by-Rule

Permits-by-Rule	
General Construction Activities	7:13-7.1 Permit-by-rule 1 Normal property maintenance
	7:13-7.2 Permit-by-rule 2 Repair of a lawfully existing structure
	7:13-7.3 Permit-by-rule 3 In-kind replacement of a lawfully existing structure
	7:13-7.4 Permit-by-rule 4 Removal of any lawfully existing fill or structures
	7:13-7.5 Permit-by-rule 5 Removal of accumulated sediment and debris from a regulated water by hand
	7:13-7.6 Permit-by-rule 6 Removal of major obstructions from a regulated water with machinery
	7:13-7.7 Permit-by-rule 7 Placement of no more than five cubic yards of landscaping material
	7:13-7.8 Permit-by-rule 8 Construction at or below grade in a fluvial flood hazard area
	7:13-7.9 Permit-by-rule 9 General construction activities in a tidal flood hazard area
	7:13-7.10 Permit-by-rule 10 General construction activities located outside a flood hazard area in a riparian zone
Buildings	7:13-7.11 Permit-by-rule 11 Reconstruction, relocation, and/or elevation of a lawfully existing building
	7:13-7.12 Permit-by-rule 12 Construction of an addition(s) to a lawfully existing building
	7:13-7.13 Permit-by-rule 13 Construction of non-habitable building(s)
	7:13-7.14 Permit-by-rule 14 Construction of a partially-open structure(s)
	7:13-7.15 Permit-by-rule 15 Construction of barrier-free access to a building
	7:13-7.16 Permit-by-rule 16 Construction of a deck
	7:13-7.17 Permit-by-rule 17 Construction of a dock, pier, or boathouse
Water Dependent	7:13-7.18 Permit-by-rule 18 Construction of a boat launching ramp
	7:13-7.19 Permit-by-rule 19 Replacement, renovation, or reconstruction of certain water dependent structures
	7:13-7.20 Permit-by-rule 20 Construction of a fence
Specific Construction	7:13-7.21 Permit-by-rule 21 Construction of a swimming pool associated with residential use
	7:13-7.22 Permit-by-rule 22 Construction of a trail and/or boardwalk
	7:13-7.23 Permit-by-rule 23 Construction of a footbridge
	7:13-7.24 Permit-by-rule 24 Construction of a tank
	7:13-7.25 Permit-by-rule 25 Construction of an aboveground athletic and/or recreational structure
	7:13-7.26 Permit-by-rule 26 Forest management activities
	7:13-7.27 Permit-by-rule 27 Repair, maintenance, and/or dredging of a manmade canal
	7:13-7.28 Permit-by-rule 28 Filling of an abandoned roadway
	7:13-7.29 Permit-by-rule 29 Placement of one to three wind turbines
	7:13-7.30 Permit-by-rule 30 Placement of solar panels and associated equipment
	7:13-7.31 Permit-by-rule 31 Placement of a floating aerator
7:13-7.32 Permit-by-rule 32 Construction of an aquatic habitat enhancement device	
Utilities	7:13-7.33 Permit-by-rule 33 Placement of one or more utility poles
	7:13-7.34 Permit-by-rule 34 Placement of one or more utility open-frame towers
	7:13-7.35 Permit-by-rule 35 Placement of one or more utility monopole towers
	7:13-7.36 Permit-by-rule 36 Placement of an underground utility line using directional drilling or jacking

Permits-by-Rule		
7:13-7.37	Permit-by-rule 37	Placement of an underground utility line beneath existing pavement that crosses a regulated water
7:13-7.38	Permit-by-rule 38	Attachment of a utility line to a lawfully existing roadway or railroad that crosses a regulated water
7:13-7.39	Permit-by-rule 39	Placement of an underground utility line that does not cross a regulated water
7:13-7.40	Permit-by-rule 40	Milling, repaving, and/or resurfacing of a lawfully existing pavement
7:13-7.41	Permit-by-rule 41	Placement of a guiderrail along a lawfully existing public roadway
7:13-7.42	Permit-by-rule 42	Reconstruction of all or part of a lawfully existing bridge superstructure
7:13-7.43	Permit-by-rule 43	Placement of traffic safety structures on poles
7:13-7.44	Permit-by-rule 44	Surveying activities
7:13-7.45	Permit-by-rule 45	Geotechnical and archaeological investigation activities
7:13-7.46	Permit-by-rule 46	Installation of one or more monitoring wells
7:13-7.47	Permit-by-rule 47	Construction of a gauge, weir, or similar device
7:13-7.48	Permit-by-rule 48	Temporary storage of unsecured construction material outside a roadway
7:13-7.49	Permit-by-rule 49	Storage of unsecured material associated with a single family home or duplex
7:13-7.50	Permit-by-rule 50	Storage of unsecured material associated with a habitable building or facility, other than a single family home or duplex
7:13-7.51	Permit-by-rule 51	Storage of unsecured material associated with a facility that stores and distributes material
7:13-7.52	Permit-by-rule 52	Placement, storage, or processing of hazardous substances
7:13-7.53	Permit-by-rule 53	Placement, storage, or processing of solid waste or recyclable materials at a lawfully existing facility
7:13-7.54	Permit-by-rule 54	Continuation of lawfully existing agricultural activities
7:13-7.55	Permit-by-rule 55	Commencement of new agricultural activities
7:13-7.56	Permit-by-rule 56	Continuation or commencement of natural resource conservation practices associated with agricultural activities
7:13-7.57	Permit-by-rule 57	Construction of a non-habitable building for agricultural purposes
7:13-7.58	Permit-by-rule 58	Filling or modification of a manmade regulated water for freshwater wetlands restoration
7:13-7.59	Permit-by-rule 59	Creation of a ford across a regulated water to manage livestock
7:13-7.60	Permit-by-rule 60	Construction of a fence along and/or across a regulated water to manage livestock
7:13-7.61	Permit-by-rule 61	Construction of a pump and/or water intake structure in or along a regulated water for livestock
7:13-7.62	Permit-by-rule 62	Construction of a manure management structure for livestock or horses
7:13-7.63	Permit-by-rule 63	Application of herbicide within riparian zones to control invasive plant species
7:13-7.37	Permit-by-rule 37	Placement of an underground utility line beneath existing pavement that crosses a regulated water
7:13-7.38	Permit-by-rule 38	Attachment of a utility line to a lawfully existing roadway or railroad that crosses a regulated water
7:13-7.39	Permit-by-rule 39	Placement of an underground utility line that does not cross a regulated water
7:13-7.40	Permit-by-rule 40	Milling, repaving, and/or resurfacing of a lawfully existing pavement
7:13-7.41	Permit-by-rule 41	Placement of a guiderrail along a lawfully existing public roadway
7:13-7.42	Permit-by-rule 42	Reconstruction of all or part of a lawfully existing bridge superstructure
7:13-7.43	Permit-by-rule 43	Placement of traffic safety structures on poles
7:13-7.44	Permit-by-rule 44	Surveying activities
7:13-7.45	Permit-by-rule 45	Geotechnical and archaeological investigation activities
7:13-7.46	Permit-by-rule 46	Installation of one or more monitoring wells
7:13-7.47	Permit-by-rule 47	Construction of a gauge, weir, or similar device
7:13-7.48	Permit-by-rule 48	Temporary storage of unsecured construction material outside a roadway
7:13-7.49	Permit-by-rule 49	Storage of unsecured material associated with a single family home or duplex
7:13-7.50	Permit-by-rule 50	Storage of unsecured material associated with a habitable building or facility, other than a single family home or duplex
7:13-7.51	Permit-by-rule 51	Storage of unsecured material associated with a facility that stores and distributes material
7:13-7.52	Permit-by-rule 52	Placement, storage, or processing of hazardous substances
7:13-7.53	Permit-by-rule 53	Placement, storage, or processing of solid waste or recyclable materials at a lawfully existing facility
7:13-7.54	Permit-by-rule 54	Continuation of lawfully existing agricultural activities
7:13-7.55	Permit-by-rule 55	Commencement of new agricultural activities
7:13-7.56	Permit-by-rule 56	Continuation or commencement of natural resource conservation practices associated with agricultural activities
7:13-7.57	Permit-by-rule 57	Construction of a non-habitable building for agricultural purposes
7:13-7.58	Permit-by-rule 58	Filling or modification of a manmade regulated water for freshwater wetlands restoration
7:13-7.59	Permit-by-rule 59	Creation of a ford across a regulated water to manage livestock
7:13-7.60	Permit-by-rule 60	Construction of a fence along and/or across a regulated water to manage livestock
7:13-7.61	Permit-by-rule 61	Construction of a pump and/or water intake structure in or along a regulated water for livestock
7:13-7.62	Permit-by-rule 62	Construction of a manure management structure for livestock or horses
7:13-7.63	Permit-by-rule 63	Application of herbicide within riparian zones to control invasive plant species

Other Activities		

Flood Hazard Area Control Act: General Permits-by-Certification

General Permits-by-Certification			
Agricultural Activities	7:13-8.1	General permit-by-certification	Removal of accumulated sediment and debris from a regulated water for agricultural purposes
	7:13-8.2	General permit-by-certification	Construction of an agricultural roadway crossing
	7:13-8.3	General permit-by-certification	Agricultural bank stabilization and/or bank restoration activities
Environmental Enhancement	7:13-8.4	General permit-by-certification	Enhancement of a riparian zone through the planting of native, non-invasive plant species
	7:13-8.5	General permit-by-certification	Reconstruction, relocation, expansion, and/or elevation of a building outside a floodway
Buildings	7:13-8.6	General permit-by-certification	Construction of one single-family home or duplex in a tidal flood hazard area
	7:13-8.8	General permit-by-certification	Construction of an addition to a lawfully existing building
	7:13-8.7	General permit-by-certification	Removal of accumulated sediment and debris from an engineered channel
Sediment Removal	7:13-8.9	General permit-by-certification	Sediment and debris removal within and/or adjacent to a bridge, culvert, or outfall by a public entity
	7:13-8.10	General permit-by-certification	In-kind replacement of a culvert
Maintenance and Replacement	7:13-8.11	General permit-by-certification	Maintenance of existing manmade stormwater management structures and conveyances
	7:13-8.15	General permit-by-certification	In-kind replacement of public infrastructure
Surveying or Water Monitoring	7:13-8.12	General permit-by-certification	Surveying and geotechnical and archaeological investigation activities
	7:13-8.14	General permit-by-certification	Placement of water monitoring devices
Alternative Energy	7:13-8.13	General permit-by-certification	Placement of solar panels
Trails and Footbridges	7:13-8.16	General permit-by-certification	Construction of a footbridge

Flood Hazard Area Control Act: General Permits by Category

General Permits		
In-Stream Activities	7:13-9.1	General permit 1 - Channel cleaning under the Stream Cleaning Act
	7:13-9.2	General permit 2 - Mosquito control water management activities
Bridges and Roads	7:13-9.3	General permit 3 - Scour protection activities at bridges and culverts
	7:13-9.7	General permit 7 - Relocation of manmade roadside ditches to facilitate public roadway improvements
	7:13-9.9	General permit 9 - Construction or reconstruction of a bridge or culvert across a regulated water with a drainage area of less than 50 acres
	7:13-9.10	General permit 10 - Reconstruction of a bridge or culvert across a regulated water with a drainage area of 50 acres or more
Buildings	7:13-9.5	General permit 5 - Reconstruction and/or elevation of a building in a floodway
	7:13-9.6	General permit 6 - Construction of one single-family home or duplex, and one associated driveway that does not cross a regulated water
Trails and Footbridges	7:13-9.12	General permit 12 - Construction of footbridges
	7:13-9.13	General permit 13 - Construction of trails and boardwalks
Other Activities	7:13-9.4	General permit 4 - Creation, restoration, and enhancement of habitat and water quality values and functions
	7:13-9.8	General permit 8 - Placement of storage tanks
	7:13-9.11	General permit 11 - For a stormwater outfall along a regulated water with a drainage area of less than 50 acres
	7:13-9.14	General permit 14 - Application of herbicide within riparian zones to control invasive plant species

Note: Development under the jurisdiction of the Coastal Zone Management (CZM) Rules do not require a separate NJDEP Flood Hazard Area Control Act (FHACA) Permit. However, per Section 7:7-9.25 of the CZM Rules, the development must still meet the NJDEP FHACA Rules. Furthermore, any development listed under a CZM Permit-by-Rule, General Permit-by-Certification, or General Permit that is regulated under the NFIP, must still be reviewed by the FPA and issued a Floodplain Development Permit. Examples include but are not limited to single-family home construction or expansion, as well as filling tidelands.

Coastal Zone Management Rules: Permits-by-Rule

Permits-by-Rule		
7:7-4.1	Permit by-rule 1	Expansion of a single-family home or duplex
7:7-4.2	Permit by-rule 2	Development of a single-family home or duplex and/or accessory development on a bulkheaded lot
7:7-4.3	Permit-by-rule 3	Placement of public safety or beach/dune ordinance signs on beaches or dunes and placement of signs on beaches or dunes at public parks
7:7-4.4	Permit-by-rule 4	Construction of nonresidential docks, piers, boat ramps, and decks located landward of mean high water line
7:7-4.5	Permit-by-rule 5	Construction of portion of a recreational dock or pier located landward of mean high water line
7:7-4.6	Permit-by-rule 6	Reconstruction of a residential or commercial development within the same footprint
7:7-4.7	Permit-by-rule 7	Expansion or relocation (with or without expansion) landward or parallel to the mean high water line of the footprint of a residential or commercial development
7:7-4.8	Permit by-rule 8	Construction of a utility line attached to a bridge or culvert
7:7-4.9	Permit-by-rule 9	Previous filling of tidelands associated with an existing single family home or duplex
7:7-4.10	Permit by-rule 10	Construction of portion of boat ramp located landward of the mean high water line at a residential development
7:7-4.11	Permit-by-rule 11	Construction and/or installation of a boat wash wastewater system at a marina, boardwalk, or boat sales facility
7:7-4.12	Permit by rule 12	Construction of one to three wind turbines less than 200 feet in height having a cumulative rotor swept area no greater than 2,000 square feet
7:7-4.13	Permit-by-rule 13	Installation of solar panels on a maintained lawn or landscaped area at a single-family home or duplex lot
7:7-4.14	Permit by-rule 14	Reconfiguration of any legally existing dock, wharf, or pier at a legally existing marina
7:7-4.15	Permit-by rule 15	Placement of sand fencing to create or sustain a dune
7:7-4.16	Permit-by-rule 16	Placement of land-based upwehers and racways for aquaculture activities
7:7-4.17	Permit-by-rule 17	Placement of predator screens and oyster spat attraction devices within a shellfish lease area
7:7-4.18	Permit-by-rule 18	Placement of shellfish cages within a shellfish lease area
7:7-4.19	Permit-by-rule 19	Construction and/or installation of a pumpout facility and/or pumpout support facilities
7:7-4.20	Permit-by-rule 20	Implementation of a sediment sampling plan for sampling in a water area as part of a dredging or dredged material management activity or as part of a remedial investigation of a contaminated site
7:7-4.21	Permit-by-rule 21	Application of herbicide within coastal wetlands to control invasive plant species
7:7-4.22	Permit-by-rule 22	Construction of a swimming pool, spa, or hot tub and associated decking on a bulkheaded lot without wetlands
7:7-4.23	Permit-by-rule 23	Installation of an at-grade dune walkover at a residential, commercial, or public development other than a single-family home or duplex

Coastal Zone Management Rules: General Permits-by-Certification

General Permits-by-Certification		
7:7-5.1	General permit-by-certification 10	- Reconstruction of a legally existing functioning bulkhead in-place or upland of a legally existing functioning bulkhead
7:7-5.2	General permit-by-certification 15	- Construction of piers, docks, including jet ski ramps, pilings, and boatlifts in man-made lagoons
7:7-5.3	General permit-by-certification 1A	- Installation of an elevated timber dune walkover at a residential, commercial, or public development other than a single-family home or duplex

Coastal Zone Management Rules: General Permits

General Permits			
7:7-6.1	General permit 1	-	Amusement pier expansion
7:7-6.2	General permit 2	-	Activities on a beach and dune
7:7-6.3	General permit 3	-	Voluntary reconstruction of certain residential or commercial development
7:7-6.4	General permit 4	-	Development of one or two single-family homes or duplexes
7:7-6.5	General permit 5	-	Expansion, or reconstruction (with or without expansion), of a single-family home or duplex
7:7-6.6	General permit 6	-	Construction of a bulkhead and placement of associated fill on a man-made lagoon
7:7-6.7	General permit 7	-	Construction of a revetment at a single-family home or duplex lot
7:7-6.8	General permit 8	-	Construction of gabions at a single family/duplex lot
7:7-6.9	General permit 9	-	Construction of support facilities at legally existing and operating marinas
7:7-6.10	General permit 10	-	Reconstruction of a legally existing functioning bulkhead
7:7-6.11	General permit 11	-	Investigation, cleanup, removal, or remediation of hazardous substances
7:7-6.12	General permit 12	-	Landfall of utilities
7:7-6.13	General permit 13	-	Construction of recreational facilities at public parks
7:7-6.14	General permit 14	-	Bulkhead construction and placement of associated fill at a single-family home or duplex lot
7:7-6.15	General permit 15	-	Construction of piers, docks, including jet ski ramps, pilings, and boatlifts in man-made lagoons
7:7-6.16	General permit 16	-	Minor maintenance dredging in man-made lagoons
7:7-6.17	General permit 17	-	Stabilization of eroded shorelines
7:7-6.18	General permit 18	-	Avian nesting structures
7:7-6.19	General permit 19	-	Modification of existing electrical substations
7:7-6.20	General permit 20	-	Legalization of the filling of tidelands
7:7-6.21	General permit 21	-	Construction of telecommunication towers
7:7-6.22	General permit 22	-	Construction of certain structures related to the tourism industry at hotels and motels, commercial developments, and multi-family residential developments over 75 units
7:7-6.23	General permit 23	-	Geotechnical survey borings
7:7-6.24	General permit 24	-	Habitat creation, restoration, enhancement, and living shoreline activities
7:7-6.25	General permit 25	-	Construction of one to three wind turbines less than 200 feet in height and having a cumulative rotor swept area no greater than 4,000 square feet
7:7-6.26	General permit 26	-	Construction of wind turbines less than 250 feet in height and having a cumulative rotor swept area no greater than 20,000 square feet
7:7-6.27	General permit 27	-	Dredging of sand from a man-made lagoon deposited as a result of a storm event for which the Governor declared a State of Emergency
7:7-6.28	General permit 28	-	Dredging of material from a waterway at a residential or commercial development deposited as a result of the failure of a bulkhead as a consequence of a storm event for which the Governor declared a State of Emergency
7:7-6.29	General permit 29	-	Dredging and management of material from a marina deposited as a result of a storm event for which the Governor declared a State of Emergency
7:7-6.30	General permit 30	-	Commercial shellfish aquaculture activities
7:7-6.31	General permit 31	-	Placement of shell within shellfish lease areas
7:7-6.32	General permit 32	-	Application of herbicide within coastal wetlands to control invasive plant species

APPENDIX C
Local Design Flood Elevation (LDFE) Worksheet

PART I

Site Name:	Date:
Address:	
Latitude (y):	Longitude (x):

State Flood Study ¹	FEMA Effective FIRM ²	FEMA Best Available ³ Preliminary, Draft, or Advisory Flood Hazard Data (Circle Source)	Data Available (Yes/No)	Panel Number & Date	Flood Zone Designation	Floodway (Yes/No)	LIMWA Area (Yes/No)	Design ¹ or Base Flood Elevation ^{2, 3}	Vertical Datum ⁴	⁴ Resulting Elevations below must be in same datum, if conversion factor needed, note here: NAVD88 = NGVD29 - _____ ft.	Tidal or Riverine FEMA Mapping ⁵	If Riverine, add 1 foot	Box A	Box B	Box C	Resulting Elevation
					N/A											
If none of the above data is available and/or the project is in a watershed 50 acres or greater in size, licensed NJ Professional Engineers may use NJFHCA Method 5 or 6 to approximate the DFE for Hazard Design Elevation is necessary to ensure compliance with State standards. Enter elevation in BOX D .																
Date of Letter Verifying the NJ Flood Hazard Design Flood Elevation (FHDFE): Box D																
Select highest elevation from Box A, B, C, and D to determine the New Jersey Flood Hazard Design Flood Elevation (FHDFE) and input into Box E																

¹Use Appendix 2 of the FHACA Rules (N.J.A.C. 7:13) to identify state-studied waters; or visit https://www.nj.gov/dep/floodcontrol/studied_streams.htm

²<https://msc.fema.gov/portal/home>

³The most recent available preliminary flood risk guidance FEMA has provided. The Best Available Flood Hazard Data may be depicted on but not limited to Advisory Flood Hazard Area Maps, Work Maps or Preliminary FIS and FIRM.

⁴Vertical datum conversion factor sources: FIS report or https://vdatum.noaa.gov/runapp_agreement.php

⁵Tidal flooding refers to modeled and mapped floodplains where the primary flood hazard is controlled by coastal or tidal forces. Note that many mouths and lower reaches of rivers are considered tidal. The riverine/fluvial adjustment that adds one foot to FEMA Base Flood Elevations is discussed in N.J.A.C. 7:13-3.4.

** The local Flood Damage Prevention ordinance may require that additional freeboard for a critical facility be added to the Local Minimum Freeboard calculated in Box 2 which may be higher than the State minimum freeboard calculated in Box 1. The local ordinance should be consulted to confirm the calculations in this worksheet. In no circumstance should a critical facility be constructed lower than required by both the Flood Hazard Area Control Act and the Uniform Construction Code.

07/asce24-14_highlights_jan2015.pdf

**ASCE Classes and Elevation Requirements are Defined in ASCE 24-14: [https://www.fema.gov/sites/default/files/2020-](https://www.fema.gov/sites/default/files/2020-07/asce24-14_highlights_jan2015.pdf)

*Review community ordinance to determine if the freeboard should be added to the BFE or NJ State Flood Hazard Area DFE.

Site Name:		Freeboard Requirements		Highest Elevation with Freeboard Comparison	
State Freeboard Requirements - The NJ Flood Hazard Area Control Act (NJFHACA) requires that a minimum of 1 foot of freeboard be added to the Flood Hazard Design Flood Elevation FHDFF and no lower than that required by the UCC pursuant to the calculation below for Class I through IV facilities.		Local Community Freeboard Requirements - More restrictive freeboard must be added if a higher freeboard is adopted in the Community's Flood Damage Prevention Ordinance.		ASCE 24** Type of Facility (circle one): Class I Class II Class III Class IV If Class I or II no further entry is required If Class III or IV, enter elevations below	
State	Box 1	Local	Box 2	ASCE 24 Critical Facility	Box 3
	1 Foot		1 Foot	Class III (in V Zone only) or Class IV, chose Highest Elevation from below and enter here →	
	+		+		
	Box E		Box E		
	=		=		
	Ft		Ft*		
Class III (in V Zone only) choose either: Box 1 Elevation + 1' Box 2 Elevation + 1'***		Class IV choose either: Box 1 Elevation + 2' Box 2 Elevation + 2'***		Class IV: 500-year Elevation	
Select highest DFE from State (Box 1), Local (Box 2), and ASCE (Box 3): (This is your Local DFE***)		Note Vertical Datum →		Note Flood Zone and if LIMWA Area →	

PART II

<p>Notes: Use the space below to document comments, assumptions, and sources. For example, source of the datum conversion factor or source of the ordinance BFE in Box E.</p>

***Local Design Flood Elevation Definition - the local DFE is the elevation reflective of the most recent available preliminary flood elevation guidance FEMA has provided as depicted on but not limited to Advisory Flood Hazard Area Maps, Work Maps, or Preliminary FIS and FIRM which is also inclusive of freeboard specified by the New Jersey Flood Hazard Area Control Act and Uniform Construction Codes and any additional freeboard specified in a community's ordinance. In no circumstances shall a project's LDFE be lower than a permit-specified Flood Hazard Area Design Flood Elevation or a valid NJDEP Flood Hazard Area Verification Letter plus the freeboard as required in ASCE 24 and the effective FEMA Base Flood Elevation.

SITE SPECIFICATIONS – NON-RESIDENTIAL BUILDINGS ONLY	
Lowest Electrical/Mechanical Equipment	Description:
Y / N	Y / N
Dry Floodproofing Certificate for areas below the Base Flood Elevation plus a minimum of 1-foot Freeboard	
Flood Resistant Materials	

D-1

^Non-coastal A Zone is defined as riverine areas or tidal areas landward of the Limit of Moderate Wave Action (LIMWA). Coastal A Zone is defined as tidal areas seaward of the Limit of Moderate Wave Action (LIMWA).

- Section D-1 Non-residential building:
- Section D-2 Building in a non-coastal A-Zone^:
- Section D-3 Building in a V Zone or Coastal A Zone^:
- Section D-4 Multi-family or mixed-use building:
- Section D-5 Agricultural structure:
- Section D-6 Accessory structure:
- Section D-7 Elevator proposed:
- Section D-8 Below-grade parking proposed:

PART IV – FLOOD INFORMATION - To Be Completed by the Floodplain Administrator

**APPENDIX D
PART IV – FLOOD INFORMATION – Site Specifications**

SITE SPECIFICATIONS – A ZONE BUILDINGS^a

Note: Incl. accessory structures, detached garages, and storage sheds. Subgrade crawlspaces and basements are prohibited.

Top of Lowest Floor Elevation	_____
<i>Openings in Walls and Foundations (see FEMA Technical Bulletin 1*):</i>	
Number of openings in walls and foundations	_____
Square inches of all openings	_____
Engineered openings	Y / N
Engineered opening manufacturer and model	_____
Architect/Engineer Certification of Non-Engineered opening	Y / N
Anchoring (manufactured homes, accessory buildings, storage sheds, recreational vehicles on-site greater than 180 days)	Y / N
Architect/Engineered Certification for Back-filled Stem Walls	Y / N

*<https://www.fema.gov/nrip-technical-bulletins>

^aNon-coastal A Zone is defined as riverine areas or tidal areas landward of the Limit of Moderate Wave Action (LIMWA). Coastal A Zone is defined as tidal areas seaward of the Limit of Moderate Wave Action (LIMWA).

SITE SPECIFICATIONS – V-ZONE AND COASTAL A ZONE BUILDINGS

D-3

Lowest Horizontal Member Elevation	_____
Size of Enclosure (must be less than 300 square feet external dimension for lower insurance rates)	_____
Use of Enclosure	_____
Number of openings in breakaway walls	_____
Coastal A Zone Breakaway Wall Certification	Y / N
Non-Conversion Agreement Attached	Y / N
Deed Restricted	Y / N
<i>Free of Obstruction (see FEMA Technical Bulletin 5*):</i> Access Ramps/Stairs/Decks are open to water flow	Y / N
Access Ramps / Stairs / Decks are structurally supported and independent of the structure	Y / N
Engineer's Certificate for Breakaway Walls, Engineered Walls, Slabs, or Other Potential Obstructions where Piles and Columns are not feasible	Y / N

*<https://www.fema.gov/nfip-technical-bulletins>

Non-coastal A Zone is defined as riverine areas or tidal areas seaward of the Limit of Moderate Wave Action (LIMWA). Coastal A Zone is defined as tidal areas seaward of the Limit of Moderate Wave Action (LIMWA).

SITE SPECIFICATIONS – MULTI-FAMILY AND MIXED-USE BUILDINGS

	<p>See: FEMA Flood Mitigation Measures for Multi-Family Buildings[^] & NFIP Technical Bulletin 3 - Requirements for the Design and Certification of Dry Floodproofed Non-Residential and Mixed-Use Buildings*</p> <p>Notes: Basements and below grade parking area prohibited below residential portions of multi-family structures including those for hotels and motels. Dry floodproofing is prohibited in non-residential portions of mixed-use structures in Coastal A and V Zones. Dry floodproofing is prohibited for all areas servicing residential areas and ancillary portions of residential structures which service residential areas. At least one access to residential areas must be available for use and cannot be dry floodproofed. Building systems servicing residential portions of structures cannot be located in dry-floodproofed areas and must be elevated above the LDFE.</p> <p>ASCE 24-14 limits dry floodproofing:</p> <p>1) To areas where the base flood velocities do not exceed 5 feet/second; and</p> <p>2) Any proposed human intervention is in conformance with ASCE 24-14 6.2.3</p>
Y / N	<p>Below grade basements and parking do not service any residential portions of the structure?</p>
Y / N	<p>Below grade basements and parking are not located in a Coastal A Zone or V Zone based upon an evaluation of the most recent best available flood hazard data?</p>
Y / N	<p>No residential areas including at least one building egress are dry floodproofed and all residential areas including those meeting the definition of ancillary space are above the BFE?</p>
Y / N	<p>All residential areas including those meeting the definition of ancillary space are above the BFE?</p>
Y / N	<p>Mechanical, Electrical, and Plumbing Systems are located at or above the LDFE or if below the LDFE are designed to resist flood loads and prevent water from entering or accumulating within the components and service only non-residential portions of the structure and meets the requirements of chapter 7, ASCE 24-14?</p>
Y / N	<p>Substantial Improvement and Substantial Damage measures meet standards and practices discussed in the FEMA Mitigation Measures for Multi-Family Buildings?</p>
Y / N	<p>A Floodproofing Certificate for non-residential portions of the structure has been submitted at permit application?</p>
Y / N	<p>An Emergency Operations Plan for floodproofing in non-residential portions of the structure has been submitted at permit application and meets ASCE 24-14 6.2.3?</p> <p>Note: This shall include meeting the 12-hour flood warning time unless the community operates a flood warning system. If so, the designer will have to determine the available time necessary to implement dry floodproofing measures.</p>
Y / N	<p>All proposed floodproofing products used in non-residential areas meet American National Standard for Flood Mitigation Equipment (ANSI/FM)?</p>

<p>Y / N</p>	<p><i>Inspection and Maintenance Plan</i> proposed at permit application?</p> <p>Note: Inspections are recommended at least once a year and could be coordinated with regular drills.</p>
<p>Y / N</p>	<p>The architect/engineer has provided evidence that the structure can withstand a combination of flood loads (hydrostatic, hydrodynamic, wave, and impact) according to ASCE 7?</p>
<p>Y / N</p>	<p>The <i>Floodproofing Certificate</i> has been fully completed at project completion?</p>

https://content.govdelivery.com/attachments/USDHSFEMA/2020/06/24/file_attachments/1481529/16-f-0218_Multi-FamilyGuidance_06222020.pdf

<https://www.fema.gov/nfip-technical-bulletins>

SITE SPECIFICATIONS – AGRICULTURAL STRUCTURES	
<p>FEMA Floodplain Management Bulletin P-2140 Floodplain Management Requirements for Agricultural Structures and Accessory Structures*</p> <p>Note: Variances can only be granted in municipalities that have adopted the New Jersey Model Code Coordinated Ordinance after January 2021.</p>	
Y / N	Meets the FEMA or Model Code Coordinated Ordinance definition of Agricultural Structure and is used exclusively for that use?
Y / N	If Substantial Improvement / Substantial Damage is determined, is elevation required?
Y / N	If Substantial Improvement / Substantial Damage is determined and the structure type requires dry-floodproofing, is the floodproofing proposed to the LDFE?
Note: Structure cannot be located in a V Zone or Coastal A Zone.	
Y / N	Variance requested to repair/restore to pre-flood condition and wet floodproof?
Y / N	If a variance is requested, is justification provided with an explanation of the hardship?
Y / N	Is a variance granted that restricts use?
Y / N	Is the structure anchored? Is mechanical equipment raised? Are flood resistant materials used? Does the foundation have adequate openings?

*<https://www.fema.gov/nip-technical-bulletins>

SITE SPECIFICATIONS – ACCESSORY STRUCTURES	
	<p>FEMA Floodplain Management Bulletin P-2140 Floodplain Management Requirements for Agricultural Structures and Accessory Structures*</p> <p>Note: Variances can only be granted in municipalities that have adopted the New Jersey Model Code Coordinated Ordinance after January 2021.</p>
Y / N	Meets the FEMA or Model Code Coordinated Ordinance definition of an Accessory Structure and is used exclusively for that use?
Y / N	New Construction or Substantial Improvements – Elevation Required?
Y / N	New Construction or Substantial Improvements – Dry-floodproofed at least to the LDFE?
Y / N	Variance Requested to Wet Floodproof and the New Jersey Model Code Coordinated Ordinance is adopted?
Y / N	If a variance is requested, is justification provided with an explanation of the hardship?
Y / N	A Zone – Structure is the size of a one-story two-car garage or smaller and not in a floodway? <i>Note: FEMA guidance notes that the typical footprint is less than 600 square feet (See page 19 of the Technical Bulletin).</i>
Y / N	V Zone – Structure is less than 100 square feet?
Y / N	Variance granted that restricts use?
Y / N	Is the structure anchored? Is mechanical equipment raised? Are flood resistant materials used? Does the foundation have adequate openings?

*<https://www.fema.gov/nfip-technical-bulletins>

SITE SPECIFICATIONS – ELEVATORS

Proposed Elevator meets FEMA Technical Bulletin 4*

Note: Please coordinate with your code official when reviewing elevator compliance in the SFHA.

	Elevation of lowest Electronic Controls/Junction Box/Switch	
Y / N	Lowest elevation of electronic controls is above the LDFE	
Y / N	Components below the required elevations are composed of flood damage-resistant materials and capable of resisting physical damage due to flooding	
Y / N	Float Switch Detection System to prevent the elevator cab or lift from descending into flood waters	
Y / N	Backflow Prevention for elevator shafts	
Y / N	Architect's/Engineer's Certification stating that the enclosure design can resist hydrodynamic and hydrostatic flood forces	
Y / N	Note: Elevator shafts must resist flood loads. In Zone A, shafts are not required to have flood openings; in Zone V and Coastal A Zones, shafts are not required to have breakaway walls.	
Y / N	Confirm that any hydraulic elevators below the required elevation have elevated electrical control panels, hydraulic pumps, and tanks; drainage provided for the elevator pit; hydraulic lines, hydraulic cylinders, and buffer springs located to prevent physical damage due to flooding or painted or coated with galvanic or rust-preventive paint	
Y / N	Confirm that any traction elevator systems have elevated machine rooms, and components in hoist ways below the required elevation must be protected from physical damage due to flooding	
Y / N	Chairlifts, pneumatic elevators, and platform lifts are reasonably safe from flooding (See ASCE24-14 7.5 and related commentary)	

*<https://www.fema.gov/nfip-technical-bulletins>

SITE SPECIFICATIONS – BELOW-GRADE PARKING REQUIREMENTS	
<p>See: FEMA Technical Bulletin 6, FEMA Flood Mitigation Measures for Multi-Family Buildings⁴, and NFIP Technical Bulletin 3* (if applicable, also use Checklist D-4)</p> <p>Notes: Below-Grade Parking is prohibited in Coastal A Zones and V Zones. Below-Grade Parking is prohibited in Residential Buildings and is allowed only for non-residential portions of Mixed-Use Buildings.</p>	
Y / N	An exit is available above the LDFE
Y / N	The Below-Grade Parking Garage is not located in a Coastal A Zone or V Zone based upon the most recent best available flood hazard data
Y / N	A Floodproofing Certificate for the structure has been submitted at permit application (See FEMA Technical Bulletin 3*)
Y / N	There are no residential uses proposed for the building
Y / N	Emergency Operations Plan for floodproofing in non-residential portions of the structure has been submitted at permit application that meets ASCE 24-14 6.2.3
Y / N	Note: This shall include meeting the 12-hour flood warning time unless the community operates a flood warning system. If so, the designer will have to determine the available time necessary to implement dry floodproofing measures. (See FEMA Technical Bulletin 3*)
Y / N	All proposed floodproofing products used in non-residential areas meet American National Standard for Flood Mitigation Equipment (ANSI/FM)
Y / N	Inspection and Maintenance Plan proposed at permit application
Y / N	Note: Inspections are recommended at least once a year and could be coordinated with regular drills. (See FEMA Technical Bulletin 3*)
Y / N	The architect/engineer has provided evidence that the structure can withstand a combination of flood loads (hydrostatic, hydrodynamic, wave, and impact) according to ASCE 7
Y / N	The Floodproofing Certificate has been fully completed at project completion
